OF Fax 615 214 7406 FEXECUTIVE SECRETARY

VIA HAND DELIVERY

Mr. David Waddell, Executive Secretary Tennessee Regulatory Authority 460 James Robertson Parkway Nashville, Tennessee 37243

Re: Petition by ITC^DeltaCom Communications, Inc. for Arbitration of Certain Unresolved Issues in Interconnection Agreement Negotiations Between ITC^DeltaCom and BellSouth Telecommunications, Inc.

Docket No. 99-00430

Dear Mr. Waddell:

Enclosed are the original and thirteen copies of BellSouth's Responses to the Staff Data Request dated May 25, 2001. Copies of the enclosed are being provided to counsel of record.

∀ery truly yours,

Guy M. Hicks

GMH/jej

BellSouth Telecommunications, Inc. Tennessee Regulatory Authority Docket No. 99-00430 Staff's 2nd Data Requests May 25, 2001 Item No. 1a Page 1 of 1

REQUEST:

In an order dated March 6, 2001, in Docket 97-01262 the Authority ruled that "Unbundled network elements that should be priced at the sum of the unbundled network element prices after adjustments for nonrecurring costs to reflect efficiencies." Do the nonrecurring rates for the UNE combinations not already combined in BellSouth's network found on Attachment 11 of Bell's May 22 filing, reflect the efficiencies gained from providing the elements as a combination as opposed to providing the elements on a stand along basis?

RESPONSE: No. In reviewing the rates filed on May 22, and the staff's Second Data Requests, BellSouth determined that it had not reflected adjustments to nonrecurring costs to reflect efficiencies. The attached revised nonrecurring rates, which include new combinations, reflect such efficiencies.

¹ Correction of Transcript of April 25, 2000 Authority Conference and Erratum to Second Interim Order Re: Revised Cost Studies and Geographic Deaveraging. Page 2.

BellSouth Telecommunications, Inc. Tennessee Regulatory Authority Docket No. 99-00430 Staff's 2nd Data Requests May 25, 2001 Item No. 1b Page 2 of 1

REQUEST: If these efficiencies are reflected in the nonrecurring rates, explain how the

costs of the efficiencies were calculated and provide specific examples showing the calculation of nonrecurring costs for UNE combinations not

already combined.

RESPONSE: These efficiencies are not reflected in the May 22nd rate submission.

Please see Response to No. 2 below.

BellSouth Telecommunications, Inc. Tennessee Regulatory Authority Docket No. 99-00430 Staff's 2nd Data Requests May 25, 2001 Item No. 2 Page 3 of 1

REQUEST:

If the nonrecurring rates for the UNE combinations not already combined in BellSouth's network do not reflect the efficiencies discussed in question 1, provide a detailed explanation for why these efficiencies were not recognized.

RESPONSE: The May 22 attachment to reflect the appropriate nonrecurring rates for new combinations that are in fact not combined at the time a CLEC orders the combination to serve a customer location, did not reflect such efficiencies. The nonrecurring rates submitted on May 22, should have included appropriate adjustments to reflect efficiencies of providing such combinations. The attached revised nonrecurring rates reflect such efficiencies based on the following:

> Loop/port combinations Because BellSouth has not yet performed a detailed cost study for Tennessee for other than "switch as is" situations (BellSouth's position on providing combinations of network elements), BellSouth utilized the cost studies performed in Georgia pertaining to new combinations, and used the same assumptions to remove costs from the Tennessee stand alone cost studies approved by the Authority. The resulting rates are significantly less than the sum of the parts rates provided in the May 22 filing.

Enhanced Extended Links ("EELs") BellSouth is providing the same costs it proposed in Docket No. 00-00544, which were filed on October 20, 2000. These cost studies are pending, awaiting the Authority's final decision in that docket. If the TRA adopts final rates that are different than what BellSouth filed in that docket, BellSouth will amend the ITC^DeltaCom attachment 11 to reflect any such differences.

	and loop [channelization if applicable].	
Note		
	Interim rates subject to true-up.	
•	1 Geographically Deaveraged UNE Zones and applicable rates have been established for certain services, as shown in this Agreement. Where Geographically Deaveraged UNE Zones and applicable rates are established. Statewide rates are obsolete. Further, BellSouth is in the process of enhancing its billing systems in order to accompdate this Geographically Deaveraged UNE Zone Rate Structure. Until these enhancements are accomplished, estimated to be mid 2001, the UNE Zone 1 rate will be billed for all services residing in Zones 1, 2, 3 or 4, i.e., Rates for services residing in UNE Zones 2, 3 and UNE Zone 4, where applicable, will not be billed. Once billing enhancements are complete, all applicable UNE Zone rates reflected in this Agreement will be billed. Reference Internet Website http://www.interconnection.bellsouth.com/become_clec/ docs/interconnection/deavuzns.pdf to view Geographically Deaveraged UNE Zone Designations by Central Office.	
	New EELs will only be available in the States of Georgia and Tennessee and in density Zone 1 of the following MSAs 2 in the BellSouth Region:	
	Florida - Miami, Orlando, Ft. Lauderdale	
	Louisiana - New Orleans	
	N. Carolina - Greensboro, Charlotte	
3	3 Unapproved rates are subject to true up.	
4	4 Add together the recurring rates of all the applicable network elements in order to obtain total monthly recurring rate.	
	* Examples:	
	- 2-wire VG Loop + Voice Grade Interface Card + DS1 Channelization System + DS1 Interoffice Channel	
	- DS1 Loop + DS1 Interface Card + DS3 Channelization System + DS3 Interoffice Channel	
	- DS3 Local Channel + DS3 Interoffice Channel + DS3 Channelization System + DS1 Interface Card	
5	5 NRC applies to new combinations within the State of Tennessee.	
- 6	6 The "Switch As Is" NRC is a conversion charge. One SAI charge is applicable per circuit.	
#	For currently combined EELs, network element recurring and Switch As is Charges apply. For new EELs, network element recurring and nonrecurring apply (no Switch As is Charge).
